Topics in Gerontology: Selected Annotated Bibliographies (Hardback)

Reviews
This is an amazing publication I actually have at any time go through. It is actually really interesting through reading through period. It's been developed in an exceptionally straightforward way which is merely following I finished reading through this publication where actually altered me, modify the way in my opinion.
(Noah Padberg)
Gerontology is a multidisciplinary field, and this bibliography provides a multidisciplinary perspective on research on aging. The volume begins with an introductory chapter that describes the range of interests to be found in gerontology, discusses the core concepts, and directs the reader to appropriate journals and handbooks. The bibliographic chapters that follow provide information on the most important works related to particular areas of gerontological research. Included are bibliographies on caregiving and health care, rituals related to death and dying, sleep disorders, Alzheimer's Disease, coronary disease, and the use of growth hormone in aging research. The chapters reflect social, anthropological, biological, ethical, and medical views. Each chapter begins with a brief essay on the latest trends in the field, and each entry includes a citation and a descriptive and evaluative annotation. Detailed indexes add to the usefulness of the volume.
